(54) SYSTEM AND METHOD FOR MANAGING LICENSE OF NON-GRATUITOUS SOFTWARE

(57)Abstract:

PROBLEM TO BE SOLVED: To cope with plural machine types and to detect the illegal copy of a introduction medium of chargeable software by comparing a system number included in chargeable data with a MAC address of a computer to verify and starting a requested chargeable software when data that can be started are received from a server computer.

SOLUTION: A chargeable software start program 115 reads chargeable data 114 from chargeable software that is a start object and reads a MAC address 116 of a computer by which the program 115 is carried out. The coincidence of a system number of the data 114 and the address 116 of the computer is checked. When return data from a license management program 101 shows start permission, the program 115 starts the chargeable software. This prevents the software from being illegally operated on other computers.

LEGAL STATUS

[Date of request for examination] 04.07.1997

[Date of sending the examiner's decision of rejection] 04.04.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
